

I respectfully ask the FCC to reject the NAB petition 04-160. I prefer to exercise consumer choice by getting my information from satellite radio. A service which I purchase. Why don't the major TV networks state their claim against cable??? Hmm? Cable offers weather and traffic! Yikes,, maybe that should be bill NAB 04-161 or maybe the public should lobby (or class action) against the NAB to not allow the obscene, polluted or commercial laden programming to take place on the air waves. Maybe the BBC does have the right ideal!?? Yikes!!! Leave things alone. Reject 04-160
